

Valcom's Multi-Messenger® USB

Digital Message Repeater V-9989

Valcom's Multi-Messenger USB is a solid-state digital message repeater that stores up to 99 different messages in MP3 format on industry standard USB flash drives. The messages can be assigned continuous play, timed play with a built-in timer circuit, or triggered on the eight inputs the unit provides.

Background music can also be provided through Valcom's Multi-Messenger unit. When a message is triggered for playback, the built-in digital fader will automatically fade the volume of the background music and play the selected message. After the message playback, the background music will fade back to the previous volume.

A built-in 12VDC auxiliary output allows motion detectors or heat sensors to be powered from the unit. All incoming triggers can be configured for normally-open or normally-closed triggering, as well as play once or play continuous. A rotate feature can be activated on the unit allowing for a different message to be played each time the main trigger is activated. Programming of features is extremely easy by using the manual and setting the DIP switches on the bottom of the unit.

Ideal for:

- airports
- manufacturing
- retail
- office buildings
- hospitals
- theme parks
- museum
- exhibits
- displays

Multi-Messenger Features:

- Store up to 99 messages
- Triggered and/or timed playback
- Plays MP3 files from USB Flash Drive
- Up to 4GB Flash Drives supported
- No drivers or special software needed
- Auxiliary 12VDC output for wiring sensors
- Playback quality up to 128Kbps
- Active output indication trigger
- Built-in monitor speaker
- LED status indicator
